FROM 1 TO 6 PM

WHERE:
13029 NE 20TH
STREET BELLEVUE,
WA, 98005

COST:
FREE!

GIRLS BUILD TEAMS THAT BUILD ROBOTS!

VISIT A GIRL SCOUT ROBOTICS OPEN HOUSE

Girl Scouts of Western Washington is building a robotics program for girls in grades 7-12 to compete in the FIRST Tech Challenge (FTC). In FTC, teams of up to 15 students build an 18"x18"x18" robot to solve the yearly challenge. Teams all over the world build these robots and compete with them. This year, Girl Scouts of Western Washington had their very first FTC team, the Bearded Pineapples, who competed at inter-league and state event.

At this open-house, the Bearded Pineapples and some other FTC teams will demo their robots in match-play and girls will have a chance to have a go at driving a robot. Swing by any time to check this fun event out!
